USE OF HEALx IN DOGS AND CATS

The HEALx line of natural, nontoxic products promotes health and wellness. HEALx formulas were developed by a veterinarian to reduce the use of drugs in animals by using remedies to boost the animal's own immune system.

HEALx Booster[®]

A Dietary Supplement - 4 oz (120 ml)

HEALx Booster is a mixture of organic Brazilian red palm fruit oil and a monoglyceride of a fatty acid. Veterinarians use Booster (0.02-0.06 ml/100 g body weight daily) in dogs and cats with various health conditions, including upper respiratory infections (URI) and skin infections. The palatability of the product makes administration easy.

HEALx Booster can also be used in puppies and kittens that have experienced a failure to thrive. You will notice an increased appetite, weight gain and improved skin quality and overall health.

HEALx Booster may be beneficial in:

- reducing viral, bacterial and fungal infections
- boosting the animal's immune system
- serving as a source of vitamin A precursors
- giving animals a potent antioxidant (vitamin E)
- protecting the animal's cardiovascular system
- increasing the effectiveness of NSAIDs
- helping speed recovery in conjunction with antibiotics and helping to reduce antibiotic resistance
- helping to eliminate recurrent infections
- providing a good balance of essential fatty acids, especially omega 3 and omega 6
- giving the animal a vegetarian alternative to fish oils, which are more stable than flax oil

“The use of Healx Booster in three sphynx catteries yielded consistent weight gains, increased energy levels, improved health, and improved skin quality.”*

Parkway Small Animal &
Exotic Hospital
Clinton Township, Michigan

HEALx Sunshine Factor[®]

Certified Organic Brazilian Dende
(Red Palm Fruit) Oil - 4 oz (120 ml)

"I use Sunshine Factor in dog cases and have seen synergistic effects with NSAIDs in arthritic cases. It seems to be highly palatable for dogs as well and has become part of our client education for senior care.

We have also used Sunshine Factor in multiple felines and have seen increased appetite and weight gain and improved skin quality."^{*}

HEALx Sunshine Factor may be beneficial in:

- improving skin quality, especially in cases of animals with dry flaky skin
- lowering circulating cholesterol
- serving as a source of vitamin A precursors
- giving animals a potent antioxidant (vitamin E)
- protecting the animal's cardiovascular system
- increasing the effectiveness of NSAIDs
- improving the animal's energy level, particularly in senior patients
- providing a good balance of essential fatty acids, especially omega 3 and omega 6
- giving the animal a vegetarian alternative to fish oils, which are more stable than flax oil

HEALx Sunshine Factor improves the care in geriatric patients.

HEALx Sunshine Factor is highly palatable.

"Within 2 weeks of starting HEALx Sunshine Factor, we saw improved coat and increased energy level in the dog. He's like a new dog. He acts years younger."^{*}

^{*}Thomas Bankstahl, DVM

HEALx Soother Plus[®]

Effective Pain Reliever and Nontoxic Antimicrobial
- 1 oz tube (30 ml)

“I have been using Soother Plus in multiple wound cases. It helps close and heal the wounds without infections.”*

HEALx Soother Plus may be beneficial in:

- managing swelling and inflammation
- providing pain relief for bruises, trauma, post-surgical incisions and self-inflicted wounds
- delivering antiviral, antibacterial and anti-yeast properties to superficial lesions
- providing a nontoxic alternative to antibiotics for skin problems and infections

Sphynx cat wound case using HEALx Soother Plus Cream
